

MP 101A PRECISE TEMPERATURE AND HUMIDITY PROBE

Precision meteorology probes for relative humidity and temperature -- MP101A

- # Meteorology
- # Agriculture
- # Ice-warning systems

**Professional meteorology probes for reliable measurements under extremely
Rough conditions.**

Convincing features

- # Maintenance-free humidity and temperature measurement
- # Cable length compensation up to 100m
- # Humidity sensor extremely resistant to pollutants
- # High long-term stability
- # Short response time
- # Linear voltage outputs for humidity and temperature
- # Operating ranges

Relative humidity : 0..100% relative humidity

Temperature : -40..+60° C

Technical data of the MP101A probes

Humidity/temperature probes	
------------------------------------	--

Protection	IP65
Humidity sensor	HYGROMER-C94
Temperature sensor	RTD Pt100 ohms
Relative humidity operating range	0..100% relative humidity
Temperature operating range	-40..+60°C
Output signals (linear)	
Humidity	0.1VDC=0.100% relative humidity
Temperature	-40..+60°C =-0.4..+0.6VDC
Load per output	min 1000 ohms
Measuring principle	Humidity: Capacitive Temperature: Resistance
Calibration accuracy, humidity (at 23°C)	± 1.5% (10%..95%) ± 2.5% (<10% OR >95%)
Calibration accuracy, temperature	± 0.3°C
Reproducibility	0.5% relative humidity, 0.1°C
Typical long-term stability	Typical 1%rh/year, 0.1°C
Response time	<15s(%relative humidity), <15s (°C)
Adjustment points (potentiometer) - humidity	35%, 80%, min
Adjustment points (potentiometer) - temperature	Tmin. and Tmax
Supply voltage (min./max)	4.8..26.5VDC
Max. current consumption	<4mA
Weight	170g
